KING CORN

Entertaining, humorous and artful investigation into an issue about which many of us are woefully ignorant.

Two friends, who move to the heartland to learn where their food comes from, plant and grow a bumper crop of America's most-productive, most-subsidized grain on one acre of Iowa soil. They do this with the help of friendly neighbors, genetically modified seeds, and powerful herbicides. But when they try to follow their pile of corn into the food system, what they find raises troubling questions about how we eat and how we farm.
